DRIP : 3-4.5 ML PER LTR WATER

BENEFITS:

Phosphorus (P) is involved in various processes in plants, including energy transfer, root development, and flowering.

Potassium (K) contributes to overall plant health and is involved in various physiological processes. It helps in regulating water uptake and retention, enhances root development, improves disease resistance, and promotes the movement of sugars and nutrients within the plant.

Features & Details

- Contains Nutrition of phosphorus. Plants release more nutrients in the soil, increases soil moisture for better root growth.
- Very effectively increases fertility, thereby early yield. Helps in sustained production.
- All essential ingredients in per cent international standards for increasing and increasing flowering and early yield.
- Complete Nutrition of phosphorus. Plants increase active nutrients in the soil, increase soil moisture for better root growth.
- Organic Growth Booster - helps in growth of roots, roots.
